Contact #1: How did you attempt to

contact the surgeon?

Text

Was this attempt successful?

Yes

#### Comments about attempts to contact surgeon (optional)

Surgeon texted me to to let me know of an issue with his patient.

### Complaint Overview

Enter information about surgery that resulted in a problem with any SI-BONE implant, instrument or accessory (e.g., drill bit, pin).

Date you first heard of problem with SI-BONE product.

Thursday, October 20, 2022

If problem occurred during placement Monday, October 10, 2022 of an SI-BONE device, enter date placed (initial procedure), not date of revision surgery.

Which device(s) was/were affected?

iFuse-3D

Part number(s), if available

#### Lot number(s), if available

9048503

## **Product Complaint or Adverse Event?**

Decide what type of report you are submitting.

Use this form to submit information about a complaint related to an SI-BONE product to Quality Affairs. Contact QA@si-bone.com if you have any questions.

What is the nature of the problem you are reporting?

Product complaint that caused or may have caused an adverse event or revision procedure

## **Product Complaint Without Adverse Event**

Use this form to report an SI-BONE product problem that was NOT associated with a patient adverse event.

Examples include:

- Damaged instrument
- Broken pin
- Bent pin
- · Pin advancement but no patient injury
- Problem with packaging

If a damaged part injured a patient, go back and click on "Product complaint that caused or may have caused an adverse event."

# **Select Adverse Event Type**

Select from the choices below. Your choice guides which section to complete.

If the first 3 do not apply, select "Other".

If a product problem occurred that did NOT cause a patient problem, go back and complete the "Product Complaint Without Adverse Event" section.

What problem did patient have?

Surgical wound problem

## **Symptomatic Implant Malposition Form**

Use this form if patient experienced symptomatic implant malposition resulting in nerve irritation.

(Information should be from SI-BONE staff who attended initial surgery)

The surgeon completed all steps in the IFU, including:

- Patient setup (table, spine neutral position, prone or supine position)
- Inspection of instruments and implants prior to use
- Proper views (lateral, inlet and outlet) obtained during use of instruments and placement of implants that clearly showed recommended anatomic landmarks
- Appropriate implant starting position
- (If performed) proper use of neuromonitoring guide pin and equipment
   Use of length gauge for implant length selection
- Were standard wound closure techniques used?

For above question, be specific and include all steps of the revision surgery and any complications.

- · Was the implant adjusted, removed or added?
- Were the explant holes filled with bone graft?
- Were osteotomes and the/or the removal adapter used?
- Was any non-iFuse hardware installed?

# **Pain Did Not Improve or Recurred**

Use this form if pain did not improve OR pain improved but then recurred

(Information should be from SI-BONE staff who attended initial surgery)

The surgeon completed all steps in the IFU, including:

- Patient setup (table, spine neutral position, prone or supine position)
- Inspection of instruments and implants prior to use
- Proper views (lateral, inlet and outlet) obtained during use of instruments and placement of implants that clearly showed recommended anatomic landmarks
- Appropriate implant starting position
- (If performed) proper use of neuromonitoring guide pin and equipment
   Use of length gauge for implant length selection
- Were standard wound closure techniques used?

## **Surgical Wound Problem**

Use this form if patient developed postoperative surgical wound problem (infection, dehiscence).

What is the best description of problem?

Major bleeding

#### Please describe event

5 days ago, which was 5 days after the patient's procedure they went to the hospital due to pain and bruising. After evaluation and a work-up by interventional radiology it was determined that there was a pseudo-aneurysm of one of the branches of the superior gluteal artery.

Were any SI-BONE implants removed in response to this problem?

No implants removed

Any other treatment received for problem?

They did a coiling procedure and then packed it with a compression bandage

Was patient admitted to hospital because of problem?

Yes, patient was admitted to hospital

Effect on hospitalization time course

Hospitalization was prolonged because of event

#### Add any further details

the patient, after the coiling was pain-free

#### **Other Problem**

Use this section ONLY if the patient problem is **NOT**:

- Implant malposition causing nerve irritation
- Pain did not improve or recurred
- Surgical wound problem

## **Potential Warranty Case**

Please help evaluate whether this case could qualify for SI-BONE's warranty policy.

Did patient's situation meet all of the following?

Did patient undergo a revision procedure that met all of the following:

- 1. The initial procedure involved placement of 3 SI-BONE implants on the affected side
- 2. The revision procedure:
  - Was completed within 1 year of the initial procedure
  - Was completed at the same hospital or within the same hospital system as the initial

procedure

- Was completed during a separate hospitalization from the initial procedure
  3. The patient followed all physician instructions after the initial procedure

Did patient's situation meet warranty criteria shown above?

No, not all of the above apply
