

Use this form to submit information about a complaint related to an SI-BONE product to Quality Affairs.

Contact QA@si-bone.com if you have any questions.

### **Contact Info**

Use this to record your attempts to contact and gather information from the customer

Your name	john hinken
Customer name	Bryan
How did you learn about this issue? (select all that apply)?	From the HCP or associated staff

Please provide any relevant details about your communication. Full complaint description will be captured on the following page:

During a seperate surgery Dr. Krueger informed me of this issue.

### **Complaint Overview**

Enter information about surgery that resulted in a problem with any SI-BONE implant, instrument or accessory (e.g., drill bit, pin).

Date you first heard of problem with SI-BONE product.	Tuesday, February 13, 2024
Date of original surgery (if revision is being reported) or alleged product failure	Wednesday, November 15, 2023

Indicate affected device(s) (choose all that apply)

iFuse-3D

Part number(s) (please list the number of each part involved)(required) 7045M-90

Lot number(s) 9060456

### **Product Complaint or Adverse Event?**

Decide what type of report you are submitting. Contact QA@si-bone.com if you have any questions.

## **Product Complaint Without Patient Problem**

Use this form to report an SI-BONE product problem that was NOT associated with a patient adverse event.

Examples include:

- Damaged instrument/implant
- Broken/ bent/ cut pin
- Pin advancement but no patient injury
- Packaging issue

If patient injury occured, go back and click YES to report patient problem.

(Information should be from SI-BONE staff who attended initial surgery)

The surgeon completed all steps in the IFU, including:

- Patient setup (table, spine neutral position, prone or supine position)
- Inspection of instruments and implants prior to use
- Proper views (lateral, inlet and outlet) obtained during use of instruments and placement of implants that clearly showed recommended anatomic landmarks
- Appropriate implant starting position
- (If performed) proper use of neuromonitoring guide pin and equipment Use of length gauge for implant length selection
- Were standard wound closure techniques used?

## Select Adverse Event Type

What problem did patient have?

Continued, recurrent, or new pain

## **Implant Malposition Form**

Use this form if patient an implant malposition was detected.

(Information should be from SI-BONE staff who attended initial surgery)

The surgeon completed all steps in the IFU, including:

- Patient setup (table, spine neutral position, prone or supine position)
- Inspection of instruments and implants prior to use
- Proper views (lateral, inlet and outlet) obtained during use of instruments and placement of implants that clearly showed recommended anatomic landmarks
- Appropriate implant starting position
- (If performed) proper use of neuromonitoring guide pin and equipment Use of length gauge for implant length selection
- Were standard wound closure techniques used?

### Continued, recurrent, or new pain

Use this form if pain did not improve, pain improved but then returned, or new onset pain

Best description of time course of pain recurrence:

New pain, different from pre-op

#### Describe discovered or suspected other causes of pain

New pain in her affected side (right)

If CT was performed, please email scan to QA@si-bone.com. CT results show:

Dark areas around implant WITH boney rind

#### Additional CT results / details

middle implant looked perfect yet closet to foramen

Was initial surgery attended by SI-BONE staff member?

Yes

Name of SI-BONE staff member attending initial surgery

John Hinken

(Information should be from SI-BONE staff who attended initial surgery)

The surgeon completed all steps in the IFU, including:

- Patient setup (table, spine neutral position, prone or supine position)
- Inspection of instruments and implants prior to use
- Proper views (lateral, inlet and outlet) obtained during use of instruments and placement of implants that clearly showed recommended anatomic landmarks
- Appropriate implant starting position
- (If performed) proper use of neuromonitoring guide pin and equipment Use of length gauge for implant length selection
- Were standard wound closure techniques used?

See summary of IFU steps. Did surgeon complete all steps as shown above?

Yes, all steps were completed accurately

#### Please describe any steps inaccurately performed, or other details of the case

Very poor imaginging

Did patient have revision surgery as a result of this problem?

### **Surgical Wound Problem**

Use this form if patient developed postoperative surgical wound problem (infection, dehiscence).

# **Other Problem**

Use this section ONLY if the patient problem is **NOT**:

- Implant malposition causing nerve irritation
- Pain did not improve or recurred
- Surgical wound problem

### **Revision Procedure**

Complete this form as thoroughly as possible for a complaint involving a revision surgery.

Please indicate date of revision procedure

Wednesday, April 17, 2024

Reason for revision (e.g. nerve impingement, loosening, etc.). Please be as specific as possible:

New pain running down leg

# Which step(s) were performed during the revision? Choose all that apply:

iFuse implant was repositioned

Please further describe the revision procedure (any issues with instrumentation or medical issues?. Be as specific as possible. Failure to provide details will result in continued follow up with you:

Tried to back out a bit. It was fused. Cutting blades were used. Each side was cut. Removal tool and was threaded into implant. With the mallet (slap hammer) the implant was backed out about 2 mms.

To your knowledge, was the patient's issue resolved after surgery?

Yes

You may be contacted for further information if your submission is lacking critical details. We appreciate your thoroughness.
