

Use this form to submit information about a complaint related to an SI-BONE product to Quality Affairs.

Contact **QA@si-bone.com** if you have any questions.

#### **Contact Info**

Use this to record your attempts to contact and gather information from the customer

Your name Susan Law

**Customer name** Sigurd Berven

How did you learn about this issue? (select all that apply)?

From the HCP or associated staff

# Please provide any relevant details about your communication. Full complaint description will be captured on the following page:

Patient diabetic and obese, had a bad abscesses/puss pocket on right side. Right lower lumbar removed partial rod/ pedicle screws, granite s2ai and iliac. Wash out and replaced pedicle screws only no pelvic screws.

Removed set screw and threaded granite nav driver to remove granite screw that took a good amount of torq to break the ingrowth at the tip.

#### **Complaint Overview**

Enter information about surgery that resulted in a problem with any SI-BONE implant, instrument or accessory (e.g., drill bit, pin).

Date you first heard of problem with SI-BONE product.

Thursday, May 16, 2024

Date of original surgery (if revision is being reported) or alleged product failure

Thursday, November 2, 2023

Indicate affected device(s) (choose all that apply)

iFuse Bedrock Granite

Part number(s) (please list the number of each part involved)(required)

105080BG x 1 qty SN 29900752304-101

#### Lot number(s)

105080BG x 1 qty SN 29900752304-101

## **Product Complaint or Adverse Event?**

Decide what type of report you are submitting. Contact QA@si-bone.com if you have any questions.

Did the product complaint result in a patient problem?

YES, potential or actual (Ex: required revision, patient adverse event)

# **Product Complaint Without Patient Problem**

Use this form to report an SI-BONE product problem that was NOT associated with a patient adverse event.

Examples include:

- Damaged instrument/implant
- Broken/ bent/ cut pin
- · Pin advancement but no patient injury
- Packaging issue

If patient injury occured, go back and click YES to report patient problem.

(Information should be from SI-BONE staff who attended initial surgery)

The surgeon completed all steps in the IFU, including:

- Patient setup (table, spine neutral position, prone or supine position)
- Inspection of instruments and implants prior to use
- Proper views (lateral, inlet and outlet) obtained during use of instruments and placement of implants that clearly showed recommended anatomic landmarks
- Appropriate implant starting position
- (If performed) proper use of neuromonitoring guide pin and equipment
  Use of length gauge for implant length selection
- Were standard wound closure techniques used?

## **Select Adverse Event Type**

What problem did patient have?

Surgical wound problem (e.g. hematoma, infection)

#### **Implant Malposition Form**

Use this form if patient an implant malposition was detected.

(Information should be from SI-BONE staff who attended initial surgery)

The surgeon completed all steps in the IFU, including:

- Patient setup (table, spine neutral position, prone or supine position)
- Inspection of instruments and implants prior to use
- Proper views (lateral, inlet and outlet) obtained during use of instruments and placement of implants that clearly showed recommended anatomic landmarks
- Appropriate implant starting position
- (If performed) proper use of neuromonitoring guide pin and equipment
  Use of length gauge for implant length selection
- Were standard wound closure techniques used?

## Continued, recurrent, or new pain

Use this form if pain did not improve, pain improved but then returned, or new onset pain

(Information should be from SI-BONE staff who attended initial surgery)

The surgeon completed all steps in the IFU, including:

- Patient setup (table, spine neutral position, prone or supine position)
- Inspection of instruments and implants prior to use
- Proper views (lateral, inlet and outlet) obtained during use of instruments and placement of implants that clearly showed recommended anatomic landmarks
- Appropriate implant starting position
- (If performed) proper use of neuromonitoring guide pin and equipment
  Use of length gauge for implant length selection
- Were standard wound closure techniques used?

## **Surgical Wound Problem**
